

Requests to Patients Receiving Outpatient Consultation

As a measure to prevent COVID-19 infection, please take your temperature at home before receiving outpatient consultation.

If you have a fever of 37.5°C or higher, consultations cannot be provided on that day, so be sure to call the clinical department you have an appointment with.

*** This does not apply to those who have a fever of 37.5°C or higher and who have been instructed by their primary care physician to receive consultation.**

Thank you for your understanding and cooperation.
